

Sole Proprietor Year-End Tax Planning Letter

December 9, 2022

Dear Client:

As the end of the year approaches, it is time to think of planning moves that may help lower your tax bill and stay compliant with various reporting requirements.

General Information

Business records and documents should be up to date. If you have inventories, you should take a physical count on December 31. Please remember that the due date for filing copy A of Form(s) W-2 and W-3, as well as Forms 1099-NEC and 1099-MISC, is January 31, whether you file using paper forms or electronically.

Capitalization Regulations

Please review and update your asset capitalization policy. Businesses may be able to take advantage of the “de minimis safe harbor election” to expense the cost of lower-cost assets, materials, and supplies. The amount allowed to be expensed depends on whether the taxpayer has written accounting procedures in place and, if so, whether the taxpayer has an applicable financial statement. If the taxpayer has a *written* accounting procedure and issued applicable financial statements, costs can be expensed up to \$5,000 per item. If a taxpayer does not issue financial statements, but has a written accounting policy, expenditures cannot exceed \$2,500 per item, beginning in 2016.

Business Asset Depreciation and Expense Deduction

Under the Tax Cuts & Jobs Act (TCJA), a 100% first-year deduction is allowed for qualified new and used property acquired and placed in service after September 27, 2017 and before 2023. Federal bonus depreciation drops to 80% of the cost of qualified property acquired and placed in service after December 31, 2022. *Bonus depreciation is expected to be completely phased-out by 2027 unless congress passes extension legislation.*

You should consider making expenditures for qualifying Code Section 179 property. The 2022 maximum amount that may be expensed under Code Section 179, for federal purposes, is \$1,080,000. The expense deduction is reduced dollar-for-dollar to the extent eligible Section 179 property placed in service for the year exceeds \$2,700,000. No Section 179 expense is allowed if eligible property additions exceed \$3,780,000 in 2022.

The federal maximum depreciation allowance for passenger automobiles is increased to \$11,200 for the year the vehicle is placed in service, if bonus depreciation is not claimed. For passenger automobiles eligible for first-year bonus depreciation, the first-year depreciation allowance is increased by \$8,000, resulting in a total of \$19,200. Trucks and vans (including minivans and SUVs) with a gross vehicle weight exceeding 6,000 pounds are treated as transportation equipment and are not subject to the bonus depreciation limitations. The Section 179 deduction for any SUV rated at 14,000 pounds gross vehicle weight or less is limited to \$27,000.

California does not conform to the federal bonus depreciation deduction or the Code Section 179 limits and passenger automobile depreciation changes.

Retirement Plan Contributions

Please confirm the contributions that you have made to your plan so far in 2022. Contributions of employee elective deferrals to SIMPLE IRA and SIMPLE 401(k) plans are due 30 days after the month of the payroll deferral, making the final deposit due by January 30, 2023. Contributions of employee elective deferrals to

401(k) plans are due 15 business days after the month of the payroll deferral, making the final deposit due by January 23, 2023. The maximum contribution allowed for SIMPLE plans is \$14,000 (\$17,000 if you are age 50 or older). The maximum contribution allowed for 401(k) plans is \$20,500 (\$27,000 if you are age 50 or older). Any matching contributions or non-elective contributions are due by the due date of your return, including extensions.

The contributions you make to each employee SEP-IRA cannot exceed the lesser of 25% of compensation or \$61,000. Self-employed individuals must take the net earnings from self-employment into account for their SEP calculation, and their contribution may be up to 20% of their modified net profit. Contributions for SEP-IRA plans are due by the due date of the employer's return, including extensions. Additional information on retirements for small business can be located in IRS Publication 560.

Taxable Fringe Benefits

Generally, the value of non-cash fringe benefits must be determined no later than January 31 of the following year. However, we recommend you consider the impact of the fringe benefits you provide during December to avoid penalties for not making timely payroll tax deposits.

Before you prepare W-2 forms for your employees' 2022 compensation, please review the following:

Benefits, including holiday bonuses and amounts paid in cash or cash equivalents, such as gift cards, are included in payroll, regardless of the amount. De minimus fringe benefits, such as personal use of business equipment, gifts, etc. must be small in value and infrequent. These can be excluded from payroll.

If you paid for group-term life insurance over \$50,000 for an employee or a former employee, you must report the taxable cost of excess coverage in box 12 of form W-2, with code C. The amount to report is determined by using IRS Publication 15-B.

Contributions made by an employer to an employee's health savings account (HSA) are excluded from federal wages and not subject to federal employment taxes. No exclusion from wages or taxes is allowed for California payroll reporting. The 2022 contribution limits are \$3,650 for a self-only HSA and \$7,300 for a family HSA. An additional contribution of \$1,000 is allowed if the employee is age 55, or older, at year-end.

To comply with the Affordable Care Act, employers with 250 or more employees are required to report the cost of health benefits provided in box 12 of the form W-2 with code DD.

Please remember to check form W-2, box 13, retirement plan, if your employee is an active participant in your company's retirement plan. This includes qualified retirement plans, annuity, SEP, and SIMPLE plans.

Employee Use of Company Vehicles - If you provide a vehicle to an employee (including yourself, if you are an employee of your own corporation) that was used for both business and personal use, the value of the personal use must be included on the employee's W-2 and is subject to payroll taxes.

Written records must indicate the time and place of travel, the business purpose of the expense or use, and the mileage traveled for all employee use of business vehicles.

The following is a brief description of the four different methods that can be used to determine the value of the auto provided to the employee and what records need to be kept. For more detailed information, see IRS Publication 15-B.

1. **General Valuation Rule** -- Under this rule the value of an employer-provided vehicle to be included on the employee's W-2 is its fair market value (FMV). The FMV of the vehicle is the amount an employee would have to pay a third party in an arm's-length transaction to lease the vehicle in the geographic area where the employee uses the vehicle. Neither the amount the employee considers to be the value nor the cost you incur to provide the vehicle determines its FMV. The FMV is multiplied by the ratio of personal miles to total miles driven and the result is

reduced by reimbursements, if any, received from the employee to determine the amount to include in the employee's income.

2. **Cents-Per-Mile Rule** -- Under this rule the value of an employer-provided vehicle to be included on the employee's W-2 is determined by multiplying the standard mileage rate by the total miles the employee drives the vehicle for personal purposes. The standard mileage rate for 2022 is 58.5 cents per mile, if you provide fuel. (If you did not provide fuel, you can reduce the rate to 53 cents per mile).

The cents-per-mile rate includes the value of insurance and maintenance (even if not actually provided during the period).

The cents-per-mile rule may be used for an employer-provided vehicle (including cars, vans, and trucks), first made available to an employee for personal use in calendar year 2022, with a maximum value of \$56,100.

3. **Commuting Rule** -- Under this rule the value of a vehicle provided to an employee for commuting is determined by multiplying each one-way commute (that is, from home to work or from work to home) by \$1.50. If more than one employee commutes in the vehicle, this value applies to each employee. This amount must be included in the employee's wages if not reimbursed by the employee.

The commuting rule can be used if you require the employee to commute in the vehicle, and you have a written policy against using the vehicle for personal purposes, other than commuting. However, you cannot use it for a corporate officer, a director, or certain categories of control or highly compensated employees.

4. **Annual Lease Value Rule** -- Under this rule the value of an automobile provided to an employee is determined by its annual lease value. For an automobile provided only part of the year, use either its prorated annual lease value or its daily lease value.

Instead of excluding the non-personal value, you can include the entire annual lease value of the car in the employee's wages. The employee can then claim any deductible business expense for the car as a miscellaneous itemized deduction on his or her personal California income tax return. However, employee business expenses are no longer deductible on your employee's federal income tax return.

The annual lease value includes the value of insurance and maintenance (even if not actually provided during the period). It does not include the value of fuel for personal use. If fuel for personal use is provided, then it must be included separately in the employee's wages. The fuel may be valued at FMV, or at 5.5 cents per mile.

To determine the annual lease value of an automobile you must first determine the FMV of the automobile on the first date it is available to any employee for personal use, and then find the lease value. The annual lease value table can be found on page 27 of IRS Publication 15-B. A link has been provided for your convenience: <http://www.irs.gov/pub/irs-pdf/p15b.pdf>.

Safe Harbor Rules -- Employers may implement written policy statements of "no personal use" or "commuting use only" of a company vehicle that will qualify as sufficient evidence corroborating an employee's own statement, without the need for a second set of records.

Nondeductible Parking Benefits

TCJA generally repealed an employer's income tax deduction for expenses incurred in providing qualified transportation fringe benefits (parking, commuter transportation, transit passes). However, this change did

not affect the employee's fringe benefit treatment. The amount of qualified parking excludable from an employee's income is limited to \$280 per month for 2022.

The IRS released guidance in Notice 2018-99 clarifying that a portion of taxpayers' "parking expenses" is considered nondeductible as a qualified transportation fringe benefit. This has significantly expanded the number of taxpayers that will need to calculate the nondeductible portion of their parking expenses. Now, all employers that own or lease a parking lot where their employees park will need to consider if an add-back to taxable income is required. This provision applies to expenses incurred or paid after December 31, 2017.

Other Reporting Requirements under the Affordable Care Act (ACA)

Applicable Large Employers, generally employers with 50 or more full-time employees in the prior year (including full-time equivalent employees), are subject to the ACA employer mandate, and must begin reporting "minimal essential coverage" (MEC) for their health plans.

Form 1095-C must be prepared and provided to each full-time employee. The due date to furnish form 1095-C to individuals is February 28, 2023, if filed on paper, or March 31, 2023, if filed electronically. Form 1094-C is used to report summary information and to transmit Forms 1095-C to the IRS. These forms must be filed no later than February 28, 2023, if filed on paper, or March 31, 2023, if filed electronically. Applicable Large Employers with 250 or more information returns to submit must do so electronically.

Employers that offer employer-sponsored self-insured coverage also use Form 1095-C to report information to the IRS and to employees. There are additional reporting requirements for self-insured employers. Penalties will be charged for noncompliance with the employer mandate as well as the compliance reporting.

Harassment Training

Employers with five or more employees must provide at least two hours of classroom or other effective interactive training and education regarding sexual harassment to all supervisory employees and at least one hour of classroom or other effective interactive training and education regarding sexual harassment to all nonsupervisory employees in California within six months of their assumption of a position. This training must be provided once every two years.
